

Basic measures to prevent a resurgence in infections

- 1 Behavior to avoid getting infected, and to prevent infecting others!
 - Please undertake fundamental virus prevention measures such as wearing a mask, hand washing, maintaining social distancing, avoiding the three Cs.
 - In order to reduce the chances of contact between people, please be careful when attending outdoor activities such as events and the like.
 - Currently most infections are via droplet infections in which the virus enters mainly through the nose and mouth. Be sure to wear a mask when talking!
- 2 Proper prevention of infection at eating and drinking opportunities
Please cooperate with "Kyoto Manners" when eating and drinking.

<Kyoto Manners>

- Use outlets with appropriate acrylic boards and ventilation!
 - Wear a mask when talking!
 - Disinfect your hands before meals and when leaving the outlet!
 - Please do not speak loudly at outlets!
 - Maximum of 2 hour stays with up to 4 people!
-
- Please refrain from home parties and drinking with people other than family members.
 - Please refrain from eating and drinking outdoors.
 - When eating out, please cooperate with "individual meals" in which you eat alone, and "silent meals" where you eat silently.
 - If you are a business operator who provides facilities for karaoke, please undertake thorough infection prevention measures such as preventing droplets by enforcing the wearing of a mask.
- 3 Please refrain from visiting medical institutions and facilities for the elderly.
